Author Index Volume 126 (2002)

Bafas, G.V., *see* C.I. Siettos (1) 89–104
Basak, J., *see* R.K. De (3) 277–291
Bodjanova, S., A generalized α-cut (2) 157–176
Boudouvis, A.G., *see* C.I. Siettos (1) 89–104
Bounas, A., *see* J. Leventides (2) 219–224

Calvo, T. and **R. Mesiar,** Continuous generated associative aggregation operators (2) 191–197
Casanovas, A., *see* V. Gomez (1) 121–128
Chan, P.T. and **A.B. Rad,** Adaptation and learning of a fuzzy system by nearest neighbor clustering (3) 353–366
Chang, P.-T., Fuzzy stage characteristic-preserving product life cycle modeling (1) 33– 47
Chen, B.-S., *see* H.-J. Uang (1) 63– 87
Chiu, C.-H. and **W.-J. Wang,** A simple computation of MIN and MAX operations for fuzzy numbers (2) 273–276
Chyu, C.-L., *see* C. Kao (3) 401–409
Cron, G. and **B. Dubuisson,** Pattern characteristics of an evolution between two classes (3) 293–310

De, R.K., J. Basak and **S.K. Pal,** Unsupervised feature extraction using neuro-fuzzy approach (3) 277–291
Delgado, M., D. Sánchez, M.J. Martín-Bautista and **M.A. Vila,** A probabilistic definition of a nonconvex fuzzy cardinality (2) 177–190
De Mitri, C. and **C. Guido,** Some remarks on fuzzy powerset operators (2) 241–251
Dobado, D., *see* S. Lozano (1) 23– 32
Dubois, D. and **H. Prade,** Note from the Editors-in-Chief (1) 135–135
Dubuisson, B., *see* G. Cron (3) 293–310

Er, M.J. and **S. Wu,** A fast learning algorithm for parsimonious fuzzy neural systems (3) 337–351

Gedeon, T.D., *see* L.T. Kóczy (1) 49– 61
Gomez, V. and **A. Casanovas,** Fuzzy logic and meteorological variables: a case study of solar irradiance (1) 121–128
Guido, C., *see* C. De Mitri (2) 241–251
Guu, S.-M., Fuzzy weighted averages revisited (3) 411–414

Han, J.H. and **T.Y. Kim,** Ambiguity distance: an edge evaluation measure using fuzziness of edges (3) 311–324
Hirota, K. and **W. Pedrycz,** Data compression with fuzzy relational equations (3) 325–335
Hirota, K., *see* J. Yi (1) 105–119

Jegdić, K., *see* E. Pap (1) 131–132
Jenei, S., A note on the ordinal sum theorem and its consequence for the construction of triangular norms (2) 199–205
Ji, Z., *see* W. Liu (2) 233–240
Josien, K. and **T.W. Liao,** Simultaneous grouping of parts and machines with an integrated fuzzy clustering method (1) 1– 21

Kao, C. and **C.-L. Chyu,** A fuzzy linear regression model with better explanatory power (3) 401–409
Kerre, E.E., *see* A.M. Radzikowska (2) 137–155
Kim, T.Y., *see* J.H. Han (3) 311–324
Kóczy, J.A., *see* L.T. Kóczy (1) 49– 61
Kóczy, L.T., T.D. Gedeon and **J.A. Kóczy,** Fuzzy tolerance relations and relational maps applied to information retrieval (1) 49– 61
Krätschmer, V., Limit theorems for fuzzy-random variables (2) 253–263

Larrañeta, J., *see* S. Lozano (1) 23– 32
Leventides, J. and **A. Bounas,** An approach to the selection of fuzzy connectives in terms of their additive generators (2) 219–224
Liao, T.W., *see* K. Josien (1) 1– 21
Lin, T.-S., *see* M.-S. Yang (3) 389–399
Liu, W. and **Z. Ji,** The periodicity of square fuzzy matrices based on minimal strong components (2) 233–240
Lozano, S., D. Dobado, J. Larrañeta and **L. Onieva,** Modified fuzzy C-means algorithm for cellular manufacturing (1) 23– 32

Martín-Bautista, M.J., *see* M. Delgado (2) 177–190
Mas, M., G. Mayor and **J. Torrens,** The modularity condition for uninorms and t-operators (2) 207–218
Mayor, G., *see* M. Mas (2) 207–218

Elsevier Science B.V.
